

General Pump Control & Level Indication

Tank Level Indicator

FPC-12705 & FPC-12706

This simple, yet highly effective Tank Level Indicator provides an extremely accurate and informative indication of water level within a tank. The controller is coupled to a Hydrostatic Pressure Transducer, which provides a 4-20mA signal to the Process Meter. The Process Meter displays the level in very clear LED numerals.

Features

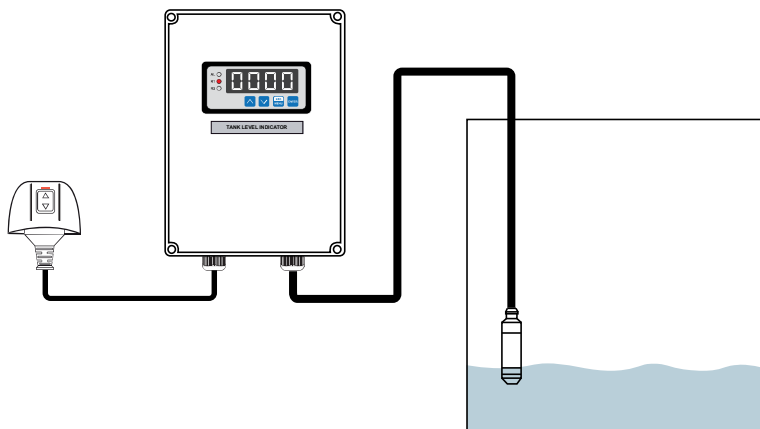

- Hydrostatic Pressure Transducer rating: 0-10m
- Process Meter has 2 relay outputs
- Display can be configured to read: m/mm (depth), percentage (full) or litres (capacity)

Process Meter

Optional: Sewage/Waste water Transducer available

Schematic

FPC-12705 Standard Version Kit Includes

Control Panel housing Process Meter
Flex & Plug for connection to Mains power
Stainless Steel Hydrostatic Pressure Transducer
c/w 10m cable

FPC-12706 Wireless Version Kit Includes

Control Panel housing Process Meter
Flex & Plug for connection to Mains power
Stainless Steel Hydrostatic Pressure Transducer
c/w 10m cable
Transmitter
Receiver
